

# CLIMATE CURVE

## Why Climate is Everything

Climate opportunities are on the rise, but climate finance and talent development are far behind pace. We need to rapidly scale funding and resources for climate organizations to tackle the climate crisis. Addressing the complexities of global warming requires a multifaceted approach across all industries, regions, and levels of the biosphere. At Climate Curve, we view the climate as everything living on Earth and how it's all interconnected—which is why we mobilize resources for an entire spectrum of solutions worldwide.

## Mission & Vision

Climate Curve is a nonprofit organization on a mission to contribute to decarbonizing the planet by identifying innovative climate leaders and deploying resources to advance solutions. We accelerate climate companies and nonprofits by providing access to capital, talent, and visibility.

We aspire to cultivate a livable planet by strengthening effective climate solutions.

## Interconnected Programs

### Keeling Curve Prize (KCP)

awards \$500,000 annually to ten global climate organizations (\$50k each) that our team of scientific experts determine are most effective and scalable.

### Constellations Fellowship

provides students and recent graduates with professional virtual internships within our global network of climate organizations.

### Climate Impact Conduit

connects our highest-scoring applicant companies and nonprofits with investors, philanthropists, and corporations for ongoing access to catalytic capital opportunities.

## IMPACT SNAPSHOT

# \$2.75M

Keeling Curve Prize funding awarded to date to 80 laureates

# \$2.87B

The capital raised by laureates after winning KCP is equivalent to 1,000x's the total award funds

# 500+

Colleges and universities partnered with Constellations Fellowship — a climate career catalyzing program

# 520

Constellations Fellows paired with climate organizations

# 76

Countries represented by KPC Finalists

# 3.27GT

Projected gigatons of annual CO<sub>2</sub>e emissions reductions of KCP Laureates\*

\*GHG emissions calculation reflects estimated numbers self-reported by KCP Laureates in metric tonnes/carbon dioxide equivalency.

## FUTURE OUTLOOK

### Keeling Curve Prize

- Increase prize purse from \$500,000 to \$1M
- Sponsorships for each prize category
- Replicating the prize for Methane and Oceans

### Constellations Fellowship

- 200 paid fellow placements annually
- Professional development & skill-building training opportunities
- Career mentorship program

### Climate Impact Conduit

- Database of 3,000 high-scoring solutions
- Paid members utilizing advisory services
- Incorporation of new, sector prize applicants
